

Developing Core Maths Pedagogy

For teachers of Core Maths looking to deepen their knowledge

www.nmmathshub.co.uk

This Work Groups give teachers opportunities, through collaboration and experimentation, to develop improved teaching approaches that support the open-ended problem-solving skills Core Maths students need to develop, and to share these with departmental colleagues. Participants will design and trial classroom activities, discuss current

trends in teaching Core Maths and share and reflect on their experiences with others in the Work Group.

The project involves a direct working partnership between the Maths Hubs Network and the Advanced Mathematics Support Programme (AMSP) and is fully funded so is free to participating schools/colleges.

Date	Time	Venue
23 rd January 2025	9:30 - 15:00	Reaseheath College, Nantwich, CW5 6DF
